PROFILE

Self-taught Frontend Developer focused on building responsive, accessible, and modern web applications using React, TypeScript, and Tailwind CSS. Passionate about UI engineering, frontend architecture, and creating intuitive user experiences through clean, maintainable code.

PROJECTS

Manager Link

React • TypeScript • MongoDB • React Router

- Developed a full-stack link management application with CRUD functionality.
- Implemented persistent storage and responsive user interfaces.
- Built with React, TypeScript, MongoDB, and modern routing practices.

GitHub: github.com/Fran-web-dev/manager-link

Task Management Application

React • TypeScript • Tailwind CSS

Developed a task management application with CRUD functionality,

- allowing users to create, edit, and delete tasks through a responsive interface.
- Implemented reusable UI components and responsive layouts.
- Focused on clean design, maintainable architecture, and user experience.

GitHub: <https://github.com/Fran-web-dev/react-task-application>

ListOfBooks

React • Tailwind CSS

- Developed a digital library application with filtering and search capabilities.
- Implemented book filtering by title and page count.
- Created a personalized reading list system.
